About us

We are among the leading providers of agricultural services and the leading grain transporter in the Baltic States and the European Union; certified multi-branch company.

The main company's key of success is – experienced and competent employees, who find answers even to the most complicated questions with great care and high sense of responsibility.

We search for solutions of new demands of our customers on regular basis, we follow the market tendencies and quality indicators, thus justifying the company's motto:

Able to help always and everywhere!

History

Story of Otanki Mill began back in 1996, when a brave decision to renovate non-functional mill was adopted by Konstantins Riepšs, father of Rīčards Riepšs, current company's Chairman of the Board.

Adapting to the market development, the company started to offer new and new services related to its line of business.

Thus, from one truck and transportation of a few cargoes of flour, the company grew to become a multi-branch company and specialist of its field, which has introduced the most up-to-date IT and technical solutions and keeps developing with every year.

Activity

We are accurate; we provide high quality and are able to provide fulfilment of voluminous orders within short period of time.

Our grain processing and logistics processes are uninterrupted–under the supervision of qualified and experienced specialists of their field.

Through the cooperation with plant breeders and local farmers, the most suitable products are selected for the production and trade of good quality products.

At the customer's request, we can pack products in different volumes and packages and deliver them to any desired place.

Barley Products

Barley should be considered a product of especially high value, because fibre therein, unlike in other crops, is located not only in the grain coat, but also in the kernel.

Fibre contained in pearl barley and groats, especially soluble-polysaccharide B – glucan, stimulates reduction of cholesterol content in blood, thus decreasing the cardiovascular disease risk, furthermore, obesity is prevented.

Considering the demand for healthy and good quality foodstuffs, production specialists of our company have also adapted the production processes and technologies, performed research works and, in cooperation with plant breeders, selected the most suitable barley variety to offer you pearl barley of the highest quality.

Barley varieties selected through the cooperation with the farmers located at the nearest vicinity are grown for the provision of production process of OtankiMill only, and this makes our products unique.

Production of fine pearl barley is just the process, which was improved throughout several years to make sure not only the quality, but also shape and look is adequate to requirements of any buyer, which we are able to provide by using technological sorting and purification processes.

Mini Pearl barley

Premium Pearl barley

Regular Pearl barley

Barley groats

	Cooking time min.	Shelf life mon.
Mini	16 - 18	24
Premium	18 - 20	24
Regular	35 - 45	24
Groats	30 - 35	24

Whole Grain Flour

Rye Flour

	Falling number	Ash content %	Moisture %	Gluten %
Wheat	250 – 300 s	1.1 – 1.3	13 – 14	26 - 29
Rye	140 – 160 s	1.5 – 1.8	13 – 14	-

For Health

Naked oat

This product has been recognized as one of the healthiest products in the world.

It contains low gluten, high mineral substances, protein, amino acids and, unlike the ordinary oat, is not thermally processed, therefore may be sprouted.

Linseed

Gluten-free product, valuable source of energy and fibre, rich in Omega 3 fatty acids – wonderful supplement of every meal.

Hemp seed

This is a gluten-free product of high value containing irreplaceable fatty acids, fibre, amino acids and other biologically active substances, furthermore, the product is natural and non-genetically modified.

Product Mixtures

At the client's request, we produce mixtures of various products in packs of various size and volume on the basis of pearl barley produced at our company.

Cooking time

18 min

Premium Pearl barley 50%
Dark Bulgur 30 %
Red Lentils 20 %

Premium Pearl barley 50%
Dark Bulgur 30 %
Indian Lentils 20 %

Premium Pearl barley 50%
Dark Bulgur 30 %
Green Lentils 20 %

Herbs

Cumin

Contained ethereal substances, vitamins (B, E), mineral substances and valuable fatty acids– these are the reasons why caraway is used not only in food, but also in medicine and cosmetics – widely grown also in Latvia.

Yellow mustard seeds

Wonderfully goes with coldroasts, sausages, grilled steak, poultry, fish and other spices. Thanks to the spicy and hot taste, yellow mustard seeds are those used for making of the traditional mustard paste.

Legume

Legumes are one of the most important sources of proteins, irreplaceable amino acids and mineral substances. Lysine contained in legumes promotes tissue regeneration and growth of organism. Peas and field beans have been recognized as the most valuable legumes used in nutrition.

Yellow Peas (whole, split)

Broad Bean

Groats and Grain

Buckwheat

Buckwheat contains the valuable B, PP, P vitamins, calcium, phosphorous, iodine, iron and amino acids. Buckwheat is of high energetic value and low carbohydrates (in comparison with other groats), and they have cholesterol lowering properties. Buckwheat contains no gluten and is hypo-allergic.

Polished Rye

This is one of the dietetically most valuable grain varieties with high content of biologically active substances and antioxidants; used for production of wholemeal bread and rye flakes.

Speltz

Wonderful source of protein, fibre, B group vitamins and mineral substances – contains magnesium, phosphorous and niacin. Cereal with low fat content; rich in fibre. Used also in distillation processes.
